

TANKCLEANING

Cleaning all types of tanks, from 205L drums to oil refinery & fuel tankers.

Eliminate sludge build up, contaminants, rust particulates and save money on inefficient machines & degraded fuel with regular tank cleaning!

Our GamaJetX system can fit through a small 4" opening and clean a 55,000L tank in one go. This automated system eliminates the need for confined space entry, making the process faster, safer and more affordable than manual cleaning.

AnK Engineering can also carry out maintenance, repairs, sand blasting and painting as required.

- 205L drums
- DEF systems
- IBC's
- Storage tanks
- Refinery tanks
- UST's & AST's
- Tankers

 **Safely removes**

- Sludge & contaminants
- Rust particulates
- Algae
- Microbial Growth
